Nature of Business Activity: Supplier of Services, Works Contract

SIGNALX

Report AI Summary

Critical Summary

In the dimension of Compliance Rigor, a critical risk has been identified due to inefficiencies in indirect tax compliance. The occurrence of seven delays in GST filings, despite no recorded defaults, indicates a recurring lapse in timely adherence to statutory deadlines. Such delays reflect gaps in process discipline and expose the organization to potential penalties, interest liabilities, and increased regulatory scrutiny, thereby impacting operational credibility and financial stability.

Overall, while the absence of defaults suggests intent to comply, the repeated delays signal a structurally weak compliance framework. Immediate corrective measures—such as process automation, stricter internal timelines, and enhanced oversight—are essential to ensure timely filings and to mitigate the risk of escalating regulatory and financial consequences

Overall Summary

The overall risk profile of the company is no_visible, based on a comprehensive data-driven analysis across all key risk dimensions. The company exhibits an overall risk profile of No Visible Risk across its assessed dimensions. Corporate Structure & Operational Capability shows No Visible Risk, supported by consistent management tenure exceeding five years. Credit History also presents No Visible Risk, confirmed by the absence of CIBIL defaults and no insolvency hits in the last 5 years. Compliance Rigor demonstrates No Visible Risk due to no identified delays or defaults in GST filings. Litigation History indicates No Visible Risk, with no cases against the target in the last 5 years, including no insolvency, criminal, or tax litigations. Defaulter and Blacklist Mentions reflect No Visible Risk, as there are no MCA defaults, no unfavorable SEBI mentions, and no defaults under SFIO, CCI, or CBI. Sanctions & PEP Mentions reveal No Visible Risk, with no hits against the party in international sanctions checks or PEP lists. Promoter & Related Party Quality shows No Visible Risk, with no legal cases, regulator defaults, trade restrictions, or political exposure identified for connected parties. Market Sentiment indicates No Visible Risk, supported by no negative signals in media research and no NCDRC cases filed against the target.

In conclusion, the risk assessment reveals that the company maintains a solid standing, with all dimensions showing No Visible Risk, indicating a stable and well-managed operational and compliance environment.

Risk Assessment Scorecard

The Risk Level of the given business target is as follows. There is an 'Overall Entity Risk' provided for an entity as per the various dimensions of risk listed under the section 'Risk Assessment Dimensions'. Each of these dimensions are further split into parameters. The rationale behind the risk classification is provided in the table subsequent to the following table. The 'Overall Entity Risk' and the Risk dimensions as well as Parameters under each dimension are color-coded as per the level of risk each one of them indicates as indexed below.

Overall Entity Risk

Moderate Risk
94.74/100

Risk Scale

- Critical Risk
- High Risk
- Moderate Risk
- No Visible Risk

Risk Dimensions	Risk Parameters

Risk Parameter	Analyst Observations
Market Regulator Defaults	Since there are No hits identified against the target under any unfavorable SEBI mentions, in the last 5 years, we have categorized the parameter as No Visible Risk.
SFIO, CBI and Other Defaults	Since there are No defaults identified against the target under SFIO, CCI and CBI in the last 5 years, we classified as No Visible Risk.
Trade Restrictions and Sanctions	Since there were No hits found against the party across international sanctions check, we have classified it as No Visible Risk.
Political Exposure Of Target	Since there were No hits found against the party across various PEP lists, we classified it as No Visible Risk.
Legal Cases Against Connected Parties	Since there are No legal cases identified against the Connected Parties in the last 5 years, we have classified it as No Visible Risk.
Regulator Defaults Against Connected Parties	Since there are No defaults identified against the Connected Parties under SEBI, MCA, SFIO, CCI and CBI, in the last 5 years. We have classified the parameter as No Visible Risk.
Trade Restrictions Connected Parties	Since there were No hits found against the Connected parties across international sanctions check, we have classified it as No Visible Risk.
Political Exposure Of Connected Parties	Since there were No hits found against the parties across PEP lists, we classified the parameter as No Visible Risk
Adverse Media	Since there are No negative signals found against the Target as per our Media Research, we have classified the parameter as No Visible Risk.
Customer Complaints	Since there are No hits under NCDRC cases filed against the target, we have classified it as No Visible Risk.

SIGNALX

Corporate Structure & Operational Capability

The Corporate Structure & Operational Capability dimension assesses the company's size and scope, management consistency, and workforce strength to evaluate its readiness to address business risks. It examines the scale of operations, leadership stability, and availability of skilled personnel to determine the organization's capacity to effectively manage and mitigate business threats.

Risk Parameter	Analyst Observations
Management Consistency	Since None of the management members have left the company before completing a standard 5 year tenure, we have categorized 'Management Consistency' as No Visible Risk.

Scale of the Company

(Amount in INR Lakhs)

Element Name	2021 - 2022	2022 - 2023	2023 - 2024	2024 - 2025	2025 - 2026
Revenue in INR YoY					

Management Consistency

Director Name	DIN	Term
DNYANESH KASHINATH NIMBALKAR	10624626	2025-Present
SANTOSH SAWALARAM SAPKAL	7545760	2024-Present

Credit History

The Credit History dimension assesses an individual's or business entity's financial background. It considers economic defaults, insolvency risk, and credit ratings to determine creditworthiness and repayment capabilities, enabling informed decisions for lenders and financial institutions.

Risk Parameter	Analyst Observations
Economic Defaults	Since there are No defaults identified against the target under CIBIL, in the last 5 years, we have classified it as No Visible Risk.
Insolvency Risk	Since there are No hits identified against the target in DRT, NCLT or NCLAT, in the last 5 years, we have classified it as No Visible Risk.

Debt Recovery, Bankruptcy and Insolvency Checks

Category	Observation/Comments	Status
CIBIL Defaulter Suit Filed (NPA) for economic defaults more than 25L	Not classified as an NPA	●
CIBIL Wilful Defaulter Suit Filed for economic defaults more than 25L INR	Not classified as a Wilful Defaulter	●
Debt Recovery Tribunal Litigations Check	No Debt Recovery Proceeding	●
Debt Recovery Appellate Tribunal Litigations Check	No Debt Recovery Proceeding	●
NCLT Litigations Check for Insolvency and Bankruptcy Orders	No Insolvency / Liquidation Proceeding	●
NCLAT Litigations Check for Insolvency and Bankruptcy Orders	No Insolvency / Liquidation Proceeding	●
IBBI Litigations Check for Insolvency and Bankruptcy Orders	No Insolvency / Liquidation Proceeding	●
RBI Compounding Orders	No Compounding Order	●

- The above checks were executed to identify economic defaults where suits were filed, debt recovery applications against the party and insolvency applications filed against the party by its creditors.
- Refer Annexure 4 for case details.
